Choose your cocktail ice.

Start with the drink. Check the glass. Plan the pieces.

THE CUT	DIMENSIONS (IN)	INSIDE WIDTH*	START HERE
2" signature cube	2 x 2 x 2	**2.96"**	Rocks / Negroni
1.75" cube	1.75 x 1.75 x 1.75	**2.60"**	Smaller rocks glass
1.5" mini cube	1.5 x 1.5 x 1.5	**2.25"**	Small / multi-cube
2.5" signature block	2.5 H x 2 x 2	**2.96"**	Roomy rocks glass
2.5" slim tall block	2.5 H x 1.75 x 1.75	**2.60"**	Narrower, tall serve
2.4" sphere	2.4 diameter	**2.53"**	Whiskey / rounded
4" Collins spear	4 H x 1.25 x 1.25	**1.90"**	Short Collins
5" highball spear	5 H x 1.25 x 1.25	**1.90"**	Tall highball

All eight standard formats: 25 pieces per pack. Engraved 2-inch cubes are ordered per piece.

*Width targets add 1/8 inch across the diameter, then round up to 0.01 inch. Assumes a round glass and upright insertion. Confirm with a sample.

THE CORNER CHECK

Square width x 1.414 = corner-to-corner width

A 2" cube needs about 2.83" across its corners; target 2.96" with allowance.

Measure the narrowest internal width along the insertion path and where the ice will sit. For height, allow the ice height plus 1/4 inch. Taper, garnish, floating and actual cut variation need a real-glass test.

SERVICE PLANNING

Drinks x pieces per drink x (1 + spare % / 100). Round up to pieces, then divide by 25 and round up for bags. Plan shaking and chilling ice separately.
